U1.1

---

---

---

---

---

---

---

---

## Learning Objective

- Notion of Algorithm
- Growth of Functions
- Recurrences
- Asymptotic Notations (Big O , ? , ? )
- Basic Efficiency Classes
- Mathematical Analysis of Algorithms
- Proof of Correctness.

© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-63, by Shivendra Goel.

U1.2

---

---

---

---

---

---

---

---

## Notion of Algorithms

- An Algorithm is a finite set of instructions that, it followed, accomplishes a particular task.

In addition, all Algorithms must satisfy the following criteria.

- 1 Input
- 2 Output
- 3 Definiteness
- 4 Finiteness
- 5 Effectiveness.

---

---

---

---

---

---

---

---

	<h2>Recurrences</h2>
<ul style="list-style-type: none"> <li>When an Algorithm contains a recursive call to itself, its running time can often be describe by a recurrence.  <math>T(n) = aT(n/b) + f(n)</math></li> </ul>	
<small>© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-43, by Shivendra Goel. U1.8</small>	

---

---

---

---

---

---

---

---

	<h2>Recurrences Cont...</h2>
<p><b>1) Substitution method</b></p> <p>This is the method of solving Recurrences which is totally based on the guess work</p>	
<small>© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-43, by Shivendra Goel. U1.9</small>	

---

---

---

---

---

---

---

---

	<h2>Recurrences Cont...</h2>
<h3>2) Iteration method</h3> <p>This method converts the recurrence into summation as then relies on techniques for bounding summations to solve the recurrence</p>	
<small>© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-43, by Shivendra Goel. U1.10</small>	

---

---

---

---

---

---

---

---

	<h2>Recurrences Cont...</h2>
<h3>3) Master Method:</h3> <p>The master method provides bounds for recurrences of the form</p> $T(n) = aT(n/b) + f(n)$	
<small>© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-43, by Shivendra Goel. U1.11</small>	

---

---

---

---

---

---

---

---

	<h2>Recurrences Cont...</h2>
<ul style="list-style-type: none"> <li>Where <math>a \geq 1, b &gt; 1</math>, and <math>f(n)</math> is a given function; it requires memorization of three cases, but once you do that, determining asymptotic bounds for many recurrences is easy.</li> </ul>	
<small>© Bharati Vidyapeeth's Institute of Computer Applications and Management, New Delhi-43, by Shivendra Goel. U1.12</small>
